

16. What is a for loop?**Answer:**

A for loop is used to iterate over a sequence such as a list, tuple, or string.

Example:

```
for i in range(5):  
    print(i)
```

17. What is a while loop?**Answer:**

A while loop repeats a block of code as long as a condition remains true.

18. What is the difference between for and while loops?**Answer:**

- Use for when the number of iterations is known.
- Use while when the number of iterations depends on a condition.

19. What are break and continue?**Answer:**

- break immediately exits the loop.
- continue skips the current iteration and moves to the next one.

20. What is the range() function?**Answer:**

The range() function generates a sequence of numbers, commonly used with for loops.

Example:

```
for i in range(1, 6):  
    print(i)
```
